Occupational Information. *Occupations. *Technical Education. *Vocational Education

A system for identifying, defining, and classifying vocational and technical education instructional programs offered by state and local school systems is outlined. The system consists of two main parts: Part I, Instructional Programs Related to Occupations, summarizes instructional programs and lists corresponding codes, titles, and worker trait groups in the "Dictionary of Occupational Titles (DOT), Third Edition." The instructional programs are included in the "Standard Terminology for Curriculum and Instruction in Local and State School Systems." Part II, Occupations Related to Instructional Programs, lists DOT codes, titles, and worker trait groups with corresponding codes and titles in the U.S. Office of Education Classification System for vocational and technical education programs. FOREWORD

Recent years have evidenced the realization that a strong relationship exists between the world of education and the world of work. The knowledges, skills, and adaptability acquired in even the most general and humanistic forms of learning contribute to economic, social, and technological progress. At the same time the man who learns a trade or other occupational skill is acquiring a background that enables him to participate more fully in the obligations of citizenship and to lead a more complete and enjoyable life.

The Vocational Education Amendments of 1968 and other education-manpower legislation have pointed out the need for strengthening and extending occupational education opportunities to all segments of the population to assist individuals in preparing for living in an increasingly technical and complex society.

The joint education and manpower responsibilities of the Department of Health, Education, and Welfare and the Department of Labor involve many common goals. One such goal is the preparation of people for success in various occupations. There has been a need for a common occupational language that would aid the

U.S. Department of Health, Education,
and Welfare

cooperative efforts of both Departments in relating education and the world of work. This document links vocational-technical education programs and occupations, and will provide a means for evaluating, comparing, and improving the results of occupational education. The publication has implications for designing curriculum content and planning education facilities in relation to lebor market needs in various occupations, for summarizing information on occupational manpower resources and requirements, as well as for guidance and counseling of youth and adults in making appropriate career and vocational choices. By facilitating more efficient planning this publication should make possible more realistic matching of educational output with occupational requirements.

Occupational education is one of our major strategies in achieving a more effective utilization of our human resources.

The task ahead is to help youth qualify for job opportunities and to provide the means for workers to keep up with changes through retraining and updating of skills.

Administration's Office of Manpower Research.

INTRODUCTION

ERIC

The Vocational Education Act of 1963 as amended by the Vocational Education Amendments of 1968 reflects the dual emphasis of the Nation's manpower policy. This policy is designed to facilitate: (1) the preparation of a qualified, well trained labor force necessary for economic growth, and (2) the development of the individual's capabilities so that he may benefit from, participate in, and adjust to changes in the world of work.

This legislation indicates that vocational-technical education programs are intended for "persons of all ages in all communities," and those courses offered under such programs must be "realistic in the light of actual and anticipated opportunities for gainful employment and must be suited to their needs, interests, and abilities to benefit from such training."

The legislation also provides that vocational-technical education include within its scope all occupations which are not generally considered professional and do not require a baccalaureate or higher degree. The challenge to vocational educators and manpower analysts becomes quite obvious in planning for, and gaging the effectiveness of, the vocational-technical education programs in relation to the manpower and occupational demands of the economy.

Department of Labor, in drafting this document. It needs to measure more accurately the extent of such needs and the Center for Educational Statistics and with the Manpower Administechnical instructional programs offered by State ol systems, and links the programs to a wide range found in all areas of our economy. This document meet this challenge, the Division of Vocational and concerned with educational planning for manpower potential contribution of vocational education to the supply of Technical Education has been working closely with the National em which identifies, defines, and classifies s country. and local schoo outlines a sys of occupations will aid those vocational and manpower in th tration, U.S. To help

In planning educational programs for manpower needs, there are three basic factors to be kept in mind:

- 1. the occupational distribution of the labor force, and projected trends in employment by occupation;
- 2. the actual work performed and the performance requirements for each occupation; and
- 3. the education and training needed by the worker for successful performance in those occupations.

Available labor force data and job information are not now fully adequate for education planners, but the techniques for obtaining better data are constantly being improved. Good sound data about the relationship of the learning force to the world of work are lacking. This document will provide a means for obtaining the missing data.

The document consists of two main parts: Part I, Instructional Programs Related to Occupations, and Part II, Occupations Related to Instructional Programs. Part I contains a list Standard Instructional Programs. Part I contains a list tional-technical education programs which are included in the Standard Terminology for Curriculum and Instruction in Local and State School Systems, 1 related to codes, titles, and worker trait groups in the Dictionary of Occupational Titles, Third Edition. 2 Part II contains a list which shows the Dictionary codes, titles, and worker trait groups related to codes and titles of vocational-technical education programs.

1/ U.S. Office of Education, Standard Terminology for Curriculum and Instruction in Local and State School Systems. State Educational Records and Reports Series: Handbook VI. Washington, 1969.

2/ U.S. Department of Labor, <u>Dictionary of Occupational Titles</u>, Third Edition, Volumes I and II. Washington: U.S. Government Printing Office, 1965.

1. The Office of Education Classification System $\frac{3}{2}$

Accurate and comparable information about vocational-technical instructional programs offered in public schools in the United States and its Territories is essential for realistic planning, efficient operation, and meaningful evaluation of such programs by State and local school system. Such information can result in improved decision-making in areas such as administration, guidance, curriculum development, and instruction.

The differences in instructional program offerings among local school systems have long called for some method for providing a standardized means of analyzing variations in curriculum content. The codes and definitions for the instructional programs contained in this document should provide a uniform basis for collecting, recording, interpreting, and transmitting meaningful data about enrollments, graduates, placements, and other significant items at the local, State, and national levels.

The classification system is intended to assist local State education agencies in identifying, classifying, and describing items of information about subject matter and curriculum activities. Seven major vocational-technical areas have been identified and coded as follows:

- 01 Agricultural 09 Ho
- 09 Home Economics
- Of Distributive Education
- 14 Office Occupations
- 07 Health Occupations Education 16 Technical Education
- 17 Trade and Industrial Occupations

The selection of the vocational-technical education areas, including the subject-matter in them, was determined by (1) an extensive study of record and report forms of local school systems and State education agencies, (2) an extensive review of a wide range of professional literature concerned with subject-matter areas and cocurricular activities, and (3) conferences with numerous persons in State education agencies, local school systems, colleges and universities, and the U.S. Office of Education.

3/The system described here is contained in Handbook VI, Standard Terminology for Curriculum and Instruction in Local and State School Systems which identifies, classifies, and describes a broad spectrum of subject-matter areas and activities offered in elementary, secondary, junior college, and adult education programs.

tion, storage, retrieval, and transmission of information about subject-matter and may be used by local and State school systems for each educational program area and for each of the classified the left of the items of information in Part I are for identifi-The coding system is intended to provide a distinct identity codes may be used with appropriate modifications in the collecitems of information within it. The code numbers appearing at cation purposes. Many of the items are refined to include one with some exceptions, have been limited to 6-digits because it the standard terminology handbook contains 10-digit codes for was felt that this level of specificity would be sufficiently many instructional programs, the codes used in this document, or more related subitems of information. The identification useful at this time. In a few cases, 8-digit codes are used where it is felt that specific data were needed for certain The interpretation of the code is as follows: for both manual and machine methods of data processing.

First 2-digit position: subject matter area Example: 14 OFFICE OCCUPATIONS

Second 2-digit position: principal segment of subject matter Example: 14.02 BUSINESS DATA PROCESSING SYSTEMS OCCUPATIONS

Third 2-digit position: division of principal segment Example: 14.0202 PERIPHERAL EQUIPMENT OPERATORS

Fourth 2-digit position: first-level detail of division of principal segment

Example: 14.020201 KEY PUNCH AND CODING EQUIPMENT OPERATORS

The standardized terminology presented in this document offers the following advantages:

- . a sounder basis for describing and evaluating administrative, organizational, and teaching practices;
- . a greater quantity of significant information to guide local, State, and national authorities in determining vocational technical educational needs and policies;
- easier and more reliable reporting on the condition and progress of vocational-technical education;
- . ease in utilizing local administrative information in reports to State agencies (facilitated by the use of electronic data processing equipment);

- consistency in the kinds of information accompanying who transfer from one school or school system to another, or from a secondary school to a college; greater pupils
- avorable conditions for research and use of research more f data;
- greater comparability of information about instructional programs within the various communities and States; and
- greater accuracy in the summaries of information compiled by local, State, and national offices.

The DICTIONARY OF OCCUPATIONAL TITLES Classification and Code

Each occupation is incorporated into a classifinearly 22,000 occupations defined in the Dictionary of for identifying and classifying applicants and job openings, and for selection, statistical reporting, and other operating purposes. $\frac{5}{2}$ The code numbers are used by the various State employment services Occupational Titles. Each occupation is incorporated into a class cation structure $\frac{47}{10}$ in which jobs are given 6-digit code numbers (e.g., 201.368) to reflect the kind and level of work performed. There are

- purpose, material, product, service, subject matter, generic term, (1) The Occapational Group Arrangement. In this arrangement the jobs are grouped according to some combination of work field, arrangement groups jobs into nine broad categories: and/or industry, as reflected in the first 3 digits of the code This number.
- ofessional, technical, and managerial occupations
- erical and sales occupations Service occupations
- Farming, fishery, forestry, and related occupations
 - Processing occupations
 - Machines trades occupations
- Benchwork occupations Structural work occupations Miscellaneous occupations
- e Introduction of Volume I of the Dictionary of Occupaled explanation of the classification structure, es, Third Edition 4/ For a detai xxi-xx of th tional Titl
- rate volume Suffix Codes for Jobs Defined in the Dic-Occupational Titles, Third Edition, released in February uffix code system has been developed for statistical reother manpower program purposes requiring unique code lished by the U.S. Department of Labor for all defined job titles identify specific jobs. Suffix codes have been pub-9-digit codes accompany the Dictionary job titles in this publication include the suffix codes, in the separ tionary of 0 1967. The 9 A 3-digit s porting and numbers to 2

The categories are divided into 84 2-digit divisions, and the divisions, in turn, are divided into 603 separate 3-digit groups. $\frac{6}{10}$ These are reflected in the first, second, and third digits of the code number, respectively. For example, the first three digits (201.) of the code for SECRETARY derive as follows: First digit position: Category 2 (Clerical and Sales Occupations)

Division 20 (Stenography, Typing, Filling, and Related Occupations) Second digit position:

Third digit position: Group 201, (Secretaries)

The fourth, fifth, and sixth digits of the code number are based on the following findings of U.S. Training and Employment Service research:

- Every job requires the worker to function in some degree in relation to Data, People, and Things.
- include the simpler ones and exclude the more complex functions. a hierarchy so that, generally, each successive function can be arranged in each case from the simple to the complex in The relationships specific to Data, People, and Things can 5
- People, and Things by identifying the highest appropriate function in each hierarchy to which the job requires the It is possible to express a job's relationship to Data, worker to have a significant relationship. ب
- Definitions of each of the categories, divisions, and groups appear in Volume II of the <u>Dictionary</u> in the section titles "Occupational Group Arrangement of Titles and Codes," beginning on p. 33. او

ERIC Full Text Provided by ERIC 4. Together, the last three digits of the code number can express the total level of complexity at which the job requires the worker to function. \(\frac{7}{2} \)

The worker function relationships within the Data, People, and Things hierarchies are as follows:

01264207	Mentoring Negotiating Instructing Supervising Diverting Persuading Speaking-Signaling Serving	012645978	0 Synthesizing 1 Coordinating 2 Analyzing 3 Compiling 4 Computing 5 Copying 6 Comparing 7) No significant	0-12m4506x
•	relationshing/	•		Ì
œ	No significant	œ) relationship $\underline{\mathbf{b}}'$	∞
7	Serving	^	No significant	~
9	Speaking-Signaling	9	Comparing	9
S	Persuading	2	Copying	2
4	Diverting	4	Computing	4
m	Supervising	m	Compiling	m
7	Instructing	7	Analyzing	7
_	Negotiating	-	Coordinating	_
0	Mentoring	0	Synthesizing	0
	0 1 0 4 0 0 0 0	Mentoring Negotiating Instructing Supervising Diverting Persuading Speaking-Signaling Serving No significant relationshin8/	0 Mentoring 1 Negotiating 2 Instructing 3 Supervising 4 Diverting 5 Persuading 6 Speaking-Signaling 7 Serving 8 No significant relationship8/	8 7 8 8 8 8 9 9 9 9 9 9 9 9 9 9 9 9 9 9

For example, the fourth, fifth, and sixth digits (.368) of the code for SECRETARY derive as follows:

Fourth digit position: The worker function Compiling (3) in the Data hierarchy.

Fifth digit position: The worker function Speaking-Signaling (6) in the People Hierarchy.

Sixth digit position: The indication of No significant relationship (8) in the Things hierarchy.

- traits, and characteristics required of an individual to achieve average successful job performance are identified in the <u>Dictionary</u> as worker traits. In the Worker Traits Arrangement jobs are grouped according to some combination of required worker trait components:

 i.e., general educational development, specific vocational preparation, <u>9</u> aptitudes, interests, temperaments, and physical demands. The Worker Traits Arrangement of Titles and Codes is organized into 22 broad areas of work.
- In the relationships of worker functions within the Date, People, and Things hierarchies are explained and defined more fully on pp. 649 and 650 in Appendix A in Volume II of the <u>Dictionary</u>.
- 8/ The numeral 8 signifies that the relationship which the job requires of the worker is not significant within a particular hierarchy. The digit 7 is used in the Data hierarchy instead of the digit 8 whenever a worker's involvement in the Things hierarchy is at the 0, 1, or 2 level and there is no significant relationship to Data.
- 2/ General educational development and specific vocational preparation together are identified as training time.

Managerial and Supervisory Work Photography and Communications Law and Law Enforcement Mathematics and Science Medicine and Health Personal Service Transportation Merchandising Machine Work Writing Counseling, Guidance, and Social Work Farming, Fishing, and Forestry Investigating, Inspecting, and Education and Training Business Relations Elemental Work Clerical Work Entertainment Engineering Crafts

These areas reflect 114 specific worker trait groups $\frac{10}{10}/$ described by narrative information under four headings:

Work Performed
Worker Requirements
Clues for Relating Applicants and Requirements
Training and methods of Entry

The narrative information is followed by a section entitled Related Classifications (a list of other worker trait groups that have something in common with this group); and a Qualifications Profile that indicates the range of worker traits ratings pertinent to jobs within that group. For example, the job of SECRETARY is found in the worker trait group Secretarial and Related Work (page 263, volume II), which is in the area of work CLERICAL WORK.

Supplemental to the classification arrangements are 229 industry designations. 11/ Each job title defined in the <u>Dictionary</u> is assigned one or more industry designations to indicate the type of economic activity with which the job is usually associated. The designations also serve to differentiate among identical titles in different types of activities.

- 10/ The Worker Trait Groups are presented in Volume II of the Dictionary in the section titled "Worker Traits Arrangement of Titles and Codes," beginning on page 225.
- L/ A detailed explanation of industry designations is presented in the introduction to Volume I of the <u>Dictionary</u>, page xvi.

 The index of industry designations, complete industry titles and definitions, and an alphabetical list of occupations! titles in each industry may be found in Volume II of the <u>Dictionary</u> in that section titles "Industry Arkangement of Titles," beginning on page 531.

This document is intended primarily as a tool to assist the State Board for Vocational Education in completing certain sections of the State Plans. It is intended also as an aid to State employment services and other manpower agencies in describing job market information in terms of educational programs for use by vocational educators in planning their programs. The document will also provide counseling and guidance personnel with realistic information concerning the relationships between vocational education programs and occupations.

defined vocational-technical education instructional programs related classified, and defined. Generally, the descriptions of the instruc-In addition, it should be noted that the programs are not associated areas in vocational and general education to round out his training. es. Instructional programs offered in the seven onal education areas have been identified, is document is a six-column listing of coded and with any particular level of education, e.g., secondary, adult, but rather are general descriptions which are intended to be reis conceivable that a student will have to take courses in other epresent composites of subject matter, and it and worker trait groups in the Dictionary of more levels when data are gathered about them. Part I of th Occupational Titl recognized vocati tional programs r to codes, tities, lated to one or

In cases where a program may be offered by one area but from a generic viewpoint classified in another, the code of the latter should be used. For example, although a practical nursing program may be included in Trade and Industrial education the code for cuch a program would be taken from the Health Occupations Education area, i.e., 07.0205.

In some instances it has been necessary to interrelate programs by means of certain cross-reference phrases. These are as follows:

"See" - An item followed by ("See...") has been absorbed into the item to which cross-reference is made. When reporting such a program, the code of the second item should be used.

Example: 01,0103 FARM MECHANICS -- (See the category 01.03 AGRICULTURAL MECHANICS.)

ol.03 AGRICULTURAL MECHANICS--A combination of subject matter and activities designed to develop abilities necessary for assisting with and/or performing the common and important operations or processes involved in the selection, operation, maintenance, and use of agricultural power, agricultural machinery and equipment, structures and utilities, soil and water management, and agricultural mechanics shop, including kindred sales and services.

"See also." - An item followed by ("See also...") also is defined, with some modification for a particular application, in the area to which the cross-reference is made. The code which is assigned should be the one that is most pertinent to the program to be reported.

Example: 14.0701 EXECUTIVE SECRETARY -- Programs concerned with secretarial coordinating, expediting, and facilitating functions of the office for aiding the executive ander his direction and in a confidential relationship. (See also 14.0801 Administrative Assistant under Supervisory and Administrative Management Occupations.)

14.0801 ADMINISTRATIVE ASSISTANT -- Programs concerned with the coordinating, expediting, and facilitating functions of the office for aiding the executive, under his direction and in a confidential relationship, in the discharge of his duties as related to personnel, the budget, records control, house-keeping, making studies, conducting analyses, reviewing reports, and other responsibilities.

"For definition see" - An item followed by ("For definition see...") indicates that the definition which occurs in one place is applicable in both programs. The code assigned depends on the area in which it is offered.

Example: 01.0701 FORESTS -- (For definition see 01.0601 FORESTS under AGRICULTURAL RESOURCES.)

01.0601 FORESTS -- A combination of subject matter and experiences concerned with forests as living communities of plants and animals in which trees are the dominant species. Emphasis is on the multiple use of forest land and resources.

"Included as"- An item followed by ("Included as ...")
contains a general description for an area which also is listed
under TECHNICAL EDUCATION. This code should be assigned if the
program is not at the technical level.

Example: 07.0203 MEDICAL LABORATORY ASSISTING --A combination of subject matter and
experiences organized to prepare a
person to work under the supervision
of medical technologists, clinical
pathologists, or physicians to perform
routine clinical laboratory procedures)

The was the second of the seco

(Included as 16.0303 MEDICAL LABORATORY ASSISTING under TECHNICAL EDUCATION.)
07.0203 MEDICAL LABORATORY ASSISTING -(For description see 07.0203 MEDICAL
LABORATORY ASSISTING under HEALTH OCCUPATIONS EDUCATION.)

"For description see" - An item followed by ("For description see...") appears only under TECHNICAL EDUCATION and indicates that the item referred to includes a description of the nature of the content of the program. This code should be assigned if the program is at the technical level.

Example: 16.0302 ELECTROENCEPHALOGRAPH TECHNICIAN--(For description see 07.0901 ELECTROENCE-PHALOGRAPH TECHNICIAN under HEALTH OCCUPATIONS EDUCATION.) A combination of subject matter and experiences designed to prepare a person to operate, maintain, and repair mechanical, electrical, and electronic equipment and instruments which are in use in medical practice. (Included as 16.0302 ELECTROENCEPHALOGRAPH TECHNICIAN under TECHNICAL EDUCATION.)

The code is a flexible one ranging from the very broad subject matter areas to very specific programs. Each succeeding level of specificity may be considered to be subsumed in the previous one. However, the 4-digit group may serve (1) to designate programs which are combinations of specialized programs such as those indicated under it in the classification system, e.g., 17.02 Appliances Repair; or (2) to provide a means for summarizing data for an entire group, e.g., 14.02 Business Data Processing Systems Occupations. In assigning a code, the most specific code that is applicable should be used.

or defined. At the present time, information about such programs matter area are intended for the designation of any instructional programs frequently identified by code 99 programs being offered that are not identifiable in any of the groups are indicators of occupations held ending in "99" at the end of each subject or the establishment of new subject matter subject matter segments. When using this code to report prothe specific program being offered should If possible any specific Dictionary code or codes The occupations which by persons completing programs which are not classified associated with it should be noted. may form the basis fo The code numbers are shown with these Specific grams, the title of is scarce. be noted.

segments. Any supplemental information such as curriculum materials or job descriptions would be welcome.

The list of occupations is not complete but is illustrative of the occupations associated with the educational programs. The selection of occupations shown is based largely on the experiences of vocational-technical educators.

In some instances, the same occupation was related to more than one subject matter area, e.g. Distributive Education and Office Occupations. Such occupations have been listed in the area which contributes the major or critical competencies needed to perform the job. Office of Education codes should be assigned which are shown as identified with the occupation.

The occupational titles of supervisors and foremen are listed with the educational programs with which they are associated, e.g., Foreman, Printing Shop is listed with 17.19 Graphic Arts Occupations; Supervisor, Computer Operations with 14.0201 Computer and Console Operators. However, specific instructional programs of a broad nature concerned with training and retraining administrative and supervisory personnel have been identified and classified. These should be reported when applicable, e.g. 01.0104 Farm Business Management; 17.17 Foremanship, Supervision and Management Development.

In order to conserve space, titles of undefined related occupations in the <u>Dictionary of Occupational Titles</u> that could be related to the educational programs have been omitted. However, in a few instances where no relationship of an educational program to a main or a defined related title could have been indicated, the undefined related titles have been used, e.g., Orthotist (078.368-026) to Orthotics (07.0404); Prosthetist (078.368-026) to Prosthetics (07.0403). Both Orthotist and Prosthetist have the same <u>Dictionary</u> code because undefined related titles were not assigned separate 9-digit codes in the <u>Dictionary</u> classification system, but take the codes of the occupational titles to which they are attached. In some instances no occupations are contained in the <u>Dictionary</u> of Occupational Titles, Third Edition, that could be related to the instructional programs, and therefore, the columns intended for the entry of <u>Dictionary</u> information are blank.

Dictionary titles and codes to the corresponding vocational education instructional programs. The 9-digit codes are listed in the left hand column in numerical order followed by the job titles, industry designations, and worker trait group page numbers. The corresponding instructional program code numbers and titles are listed in the right hand columns.

The resources, and for or improve

The Ad Hoc Committee for Agriculture applied the following rationale to the selection of the items for placement in the Agriculture subject-matter area: 1) the items were determined by consensus of the committee to be appropriate to agriculture; 2) the items could be defined in brief form using only salient descriptive elements; and 3) the various items classified under Agriculture were identifiable by titles, which the ad hoc committee considered to be most commonly used in Agriculture.

Future Farmers of America (FFA) Chapters and related leadership training and supervised occupational experience programs are significant integral activities which aid agricultural education in making contributions to the guidance and total general educational development of pupils. The Future Farmers of America and related léadership training permeate every aspect of the instructional program in agriculture. The foundation upon which the FFA is built includes leadership and character development, sportsmanship, cooperation, service, thrift, scholarship, improved agriculture, organized recreation, citizenship, and patriotism. (For a more detailed treatment of the aims and purposes of FFA see Official Manual of Future Farmers of America.)1/

DISTRIBUTIVE EDUCATION

04.00 00 00

Distributive Education includes various combinations of subject matter and learning experiences related to the performance of activities that direct the flow of goods and services, including their appropriate utilization, from the producer to the consumer or user. These activities include selling, and such sales-supporting functions as buying, transporting, storing, promoting, financing, marketing research and management.

tions are found in such areas of economic activity as retail and specified occupational levels. Distributive occupa-These programs are designed to prepare individuals progress or improve competencies in, distributive wholesale trade, finance, insurance, real estate, services and service trades, manufacturing, transportation, utilities, and skills and understanding related to marketing, merchandising, equirements for gainful employment and entreprepostsecondary, and adult education levels and is structured Emphasis is on the development of attitudes, instruction in the field of distribution and it. Instruction is offered at the secondary, Distributive education is comprised of programs of communications. occupational and managemen neurship at s to enter, or occupations. to meet the 1 marketing.

The Ad Hoc Committee for Distributive Education applied the following rationale to the selection of the items for placement in the Distributive Education area: 1) the items were determined by consensus of the committee to the appropriate to Distributive Education in terms of recent vocational education legislation; 2) the items could be defined in brief form using only salient descriptive elements; and 3) the various items classified under Distributive Education were identifiable by titles which the ad hoc committee considered to be most appropriate to Distributive Education.

Opportunities to develop leadership, social and civic awareness, and increased understanding of the world of work in distribution and marketing are provided through the Distributive Education Clubs of America, the youth organization for distributive education pupils. As an integral part of the instructional program, pupils engage in activities that extend their interests, skills, and knowledges in selected aspects of distribution and marketing. Such organized activities under appropriate supervision, are referred to as cocurricular activities.

Education for health occupations comprises the body of related subject matter, or the body of related courses, and planned experiences designed to impart knowledge and develop understandings and skills required to support the health professions. Instruction is organized to prepare pupils for occupational objectives concerned with assisting qualified personnel in providing diagnostic, therapeutic, preventive, restorative, and rehabilitative services to people, including understandings and skills essential to provide care and health services to patients.

Education for health workers usually is conducted by recognized education agencies and appropriate health institutions and services that can make available the quality and kind of experiences needed by the trainee in developing the competencies required for his occupational goal.

Instructional programs which prepare persons for occupations that render health services directly to patients provide planned instruction and experience in appropriate clinical situations. For occupations that render health services which do not involve direct services to patients, planned instruction and experience in laboratories and/or appropriate work situations are provided as an integral part of the instructional program.

Licensure, Certification, and Registration

Techniques for the regulation of workers in health occupations have been developed and administered, either by appropriate professional organizations or by legally constituted authority in the respective States, as a means to safeguarding the public against unqualified and/or unscrupulous persons. Therefore, regulatory procedures such as licensure, certification and/or registration in certain of the health occupations have been established.

ing these groups have sought and helped to establish State an occupation. All physicians, nurses, dental hygienists, and a growing number of paramedical personnel representor licensing practitioners in their fields. They occupations under State licensure laws best serves the and the standards to be met for practicing in ure ... Under the authority of a State, laws are d setting forth the minimum qualifications for he legal licensing agency for assurance that a tioner is qualified in his field. Employers, too, have come to rely so found that mandatory regulation of these interest. persons practi Licens enacte nave a upon t laws f public

Certification--Professional societies endeavor to improve the quality of services provided by supportive personnel in health fields through voluntary certification of individual workers. Standards pertaining to education, experience, and personal qualifications are determined by the professional society, usually in cooperation with the auxiliary group that is subject to the certification procedure. Applicants wishing to become certified under these standards must make application to the certifying board of the association and comply with the certification of standards.

Registration--The term registration is used by certain occupational groups interchangeably with either the term licensure or certification. "Registered" nurse connotes a nurse who is licensed to practice as a professional nurse or as a technical-level nurse. A "registered" medical librarian is certified by and registered with her professional association. Registration may be interpreted in specific instances by placing after it (1) when "licensure" applies or (c) when "certification" applies.

NOTE: In situations involving designation of "licensure," "certification," or "registration" for record and/or report purposes as applicable to selected items in this subject-matter area, the following symbols may be used: (L) for Licensure; (C) for Certification; and (R) for Registration.

The Ad Hoc Committee for Health Occupations Education applied the following rationale to the selection of substantive content for placement in Health Occupations Education area: (1) the items selected and classified were determined by consensus of the committee to be representative of the subject matter most commonly taught in health occupations education in the United States; (2) the various aspects of subject matter were identified by titles which were considered as being most commonly used; and (3) the various aspects of subject matter selected for placement under Health Occupations Education could be defined in brief form using only salient descriptive elements.

Included under the heading, Health Occupations Education, are items of information which describe selected aspects of education for health occupations. In the following definitions the term "subject matter" includes theory that may be given either in a school or in a clinical setting, and the term "experiences" includes the applied subject matter which is provided in a clinical setting.

Home economics comprises the group of related courses or units of instruction organized for purposes of enabling pupils to acquire knowledge and develop understanding, attitudes, and skills relevant to (a) personal, home, and family life, and (b) occupational preparation using the knowledge and skills of home economics. The subject matter of home economics includes, in addition to that which is unique to the area, concepts drawn from the natural and social sciences and the humanities.

The Ad Hoc Committee for Home Economics applied the following rationale to the selection of the items for placement in the Home Economics area: (1) the items were determined by consensus of the committee to be appropriate to home economics in terms of preparation for personal, home, and family living, and for occupational preparation;

(2) the items could be defined in brief form using only salient descriptive elements; and (3) the various items classified under Home Economics were identifiable by titles which were considered to be in current use in home economics.

Opportunities to develop leadership, social and civic avareness, and increased understanding of the world of work in home economics are provided through the Future Homemakers of America, a youth organization for home economics pupils. As an integral part of the instructional program, pupils in this organization engage in activities that extend their interests, skills, and knowledge in many aspects of home economics. Such organized activities, under appropriate supervision, are referred to as cocurricular activi-

09.0106	FAMILY RELATIONS The study of the nature, functions, and significance of human relationships in the family. The subject matter includes concepts and principles related to various family living conditions, the establishment and maintenance of relationships, and the preparation for marriage and family life. These designated aspects of family relationships emphasize the universality of families, the uniqueness of individuals and families, the development and socialization of the individual, and meeting the variety of needs and interests of family members.					
.0107	The study of food and its role in personal and family living, including the basic principles of health, food management, and economics. In practice, emphasis is frequently placed on meal management as a means of understanding the significance and nature of food, its care, and its preparation for individuals and families.				17 77 de 8° 8471114	
09.0108	HOME MANAGEMENT The study of the complexities and processes involved in formulating goals, making decisions, and effectively using and controlling human and other resources for establishing and maintaining a home and family. The subject matter provides for a variety of home management considerations, such as the societal and economic influences on individual and family management, values, goals and standards, family economics, and the organization of activities in the home.					
09.0109	HOUSING AND HOME FURNISHINGS The study designed to develop judgment needed for creating a favorable environment for family living. Attention is given to a complex of housing and home furnishing considerations, including the influence of housing on people; types and costs of housing; interior design; the care maintenance, and improvement of homes and furnishings; and the relation of resources to family needs.			4ny

study and extensive knowledge in a field of specialization is re-Technical education prepares for the occupational area between the skilled craftsman and the professional person such as the services performed in the tachnology. A planned sequence of specialized field of technology. The program of instruction s, materials, and processes commonly used and supporting mathematics inherent in a technology, as well as eriences, usually at the postsecondary level, normally includes the study of the underlying sciences and knowledge organized in a planned sequence of classroom and quired in technical education, including competency in the Technical education is concerned with that body of ils for a cluster of job opportunities in a basic communication skills and related general education. doctor, the engineer, and the scientist. methods, skills laboratory exp to prepare pup

The technical education curriculum must be so structured that it prepares the graduate to enter a job and be productive with a minimum of additional training after employment, provides a background of knowledge and skills which will enable him to advance with the developments in the technology, and enables him, with a reasonable amount of experience and additional education, to advance into positions of increased responsibility.

The technician frequently is employed in direct support of the professional employee. For examply, the engineering technician will be capable of performing such duties as assisting in the following engineering functions: designing, developing, testing, modifying of products and processes, production planning, writing reports, and preparing estimates; analyzing and diagnosing technical problems that involve independent decisions; and solving a wide range of technical problems by applying his background in the technical specialties—science, mathematics, and communicative and citizenship skills.

The Ad Roc Committee for Technical Education applied the following rationale to the selection of substantive content for placement in
the Technical Education area: (1) the item selected and classified
were determined as representing the subject matter most commonly
taught in technical education in the United States; (2) the various
aspects of subject matter were identified by titles which were considered as being most commonly used; and (3) the various aspects
of subject matter selected Sor placement under Technical Education
could be defined in brief form using only salient descriptive elements.

U.S. OFFICE OF EDUCATION CLASSIFICATION	Instructional program	CUSTODIAL SERVICES-Continued Skills are taught in the use and care of hand and power tools for such operations as dusting, dust mopping, wet mopping, scrubbing, waxing, and refinishing, and the cleaning of toilet rocms, windows, and walls. Additional emphasis is on (1) characteristics of various cleaning agents and protective coatingsand procedures for applying them; (2) sanitation and disinfectants (3) scheduling work; and (4) purchasing custodial supplies.	DIESEL MECHANIC Classroom and shop experiences concerned with all phases of repair work on diesel engines used to power buses, ships, trucks, railroad trains, electrical generators, construction machinery, and similar equipment, Instruction and practice is provided in diagnosis of malfunction; disassembly of engines and examination of parts; reconditioning and replacement of parts; repair and adjustment of fuel injection systems, oil and water pumps, generators, governors, auxiliary and accompanying power units, controls, and trans- missions. The uses of technical manuals, of a variety of hand and power tools, and of testing and diagnostic equipment also are studied.	DRAFTING Organized specialized learning experiences which emphasize theory, use of the drafting room and laboratory and shopwork as each relates to gathering and translating of data or specifications, including the aspects of planning, preparing, and interpretting mechanical, architectural, structural, pneumatic, marine, electrical/electronic, topographical, and other drawings and sketches. Instruction is designed to provide experiences in drawing; the use of reproduction materials, equipment, and processes; the preparation of reports and data sheets for writing specifications; the development of models. Instruction emphasizes the development of skills and knowledge essential for employment in ancillary capacities.

	U.S. OFFICE OF EDUCATION CLASSIFICATION		DICTIONARY OF OCCUPATIONAL		TITLES
Code	Instructional program	Code	Occupational Title (Vol. I)	Wor	Worker Trait Groups (Vol. II) Title
17.17	FOREMANSHIP, SUPERVISION AND MANAGEMENT DEVELOP- HENT Planned learning experiences designed to assist the supervisor in effectively utilizing the men, machines, and materials under his supervision by broadening his background knowledge and develop- ing his leadership abilities. Included is the study of human behavior; organization and manage- ment; oral communication; labor laws; personnel procedures; job analysis; work simplification; employee utilization; the development of writing techniques as applied to the preparation of letters, memos, and technical reports; speed read- ing; and safety and first-aid practices.		No D.O.T. relationship shown because this instructional program applies to the development of foremen and supervisors over a broad range of crafts, trades, and industrial functions. In most instances occupations require a combination of knowledge of supervision and knowledge of a craft, manufacturing process or operations of an industry. Classifications in the D.O.T. are made according to process involved, craft of workers supervised, product manufactured, or according to industry in which work occurs.		
17.18	GENEEAL CONTINUATION  Part-time classes-for persons under 18 years of age who have left full-time instruction to enter the labor forceproviding justruction designed primarily to increase civic intelligence rather than to develop specific occupational competence.		No D.O.T. relationship applies to this program.		
17.19	GRAPHIC ARTS OCCUPATIONS Organized, specialized learning experiences which include theory, laboratory, and shopwork as they relate to all phases of hot and cold typesetting, layout, composition, presswork, and binding, including flexography, lithography, photoengraving, and other graphic arts related to the printing industry. Emphasis is on typographical layouts and design, hand and machine typesetting, camera and plate work, imposition, typecasting, offset and platen press makeup and operation, papercutting, ink and color preparation, binding, and production by silk screen process.	659,130-010	FOREMAN, PRINTING SHOP (print. & pub.) • 36	WOODWORKING Classroom and shop experiences concerned with woodworking occupations other than construction carpentry. Instruction emphasizes laying out and shaping stock; assembling complete wooden articles or subassemblies; marking, binding, sawing, carving, and sanding wood products; and repairing wooden articles. Also emphasized are various hand and power tools and their uses.			,	,
100c*/1	Specialized class and practical work experiences concerned with mass production of products such as window frames, moldings, trim, and panels; and with making such products as furniture, store fixtures, kitchen cabinets, and office equipment. Instruction includes training in cutting, shaping, and assembling parts by means of handtools and woodworking machines; refinishing furniture; installing hardware, e.g., hinges, catches, and drawer pulls; planning layouts; blueprint reading; drafting; and features of various kinds of woods.	660.131-010 660.280-010 660.280-018 660.280-014 662.782-010 662.782-014 662.782-018 662.885-018	REMAN (WOOD OOD OOD OOD OOD OOD OOD OOD OOD OOD	430 430 430 435 435 447 447	Set-up Mach. Vocational-Technical Instructional Programs

DICTIONARY OF OCCUPATIONAL TITLES			U. S. OFFICE OF EDUCATION CLASSIFICATION	
Code	Occupational Title Vol. I	WT Gr. * Page No. Vol. II	Code	Instructional Program
9.138-010	DRIVER SUPERVISOR (motor trans.)	305	04.19	TRANSPORTATION
0.138-010	BAGGAGE-AND-MAIL AGENT (r.r. trans.)	305	04.19	TRANSPORTATION
0.138-026	RAILWAY-EXPRESS AGENT (r.r. trans.)	243	04.19	TRANSPORTATION
368-022	RESERVATION CLERK (r.r. trans.)	265	04.19	TRANSPORTATION
1.131-010	BOATSWAIN (water trans.)	299	17.0801	SEAMANSHIP
1.133-010	CADET, DECK (water trans.)	299	17.0801	SEAMANSHIP
1.138-010	BARGE CAPTAIN (water trans.) II	305	17.0802	SHIP AND BOAT OPERATION AND MAINTENAN
1.138-0 <b>1</b> 8	DOCUMENTATION SUPERVISOR (water trans.)	243	04.19	TRANSPORTATION
1.168-010	SUPERCARGO (water trans.)	261	17.0899	COMMERCIAL FISHERY OCCUPATIONS, OTHER
1.388-010	RECEIPT-AND-REPORT CLERK (water trans.)	280	14.0505	TRAFFIC, RATE, AND TRANSPORTATION CLI
1.488-010	TONNAGE-COMPILATION CLERK (water trans.)	280	14.0505	TRAFFIC, RATE, AND TRANSPORTATION CLI
1.687-010	SOUNDER (any ind.)	282	17.0801	SEAMANSHIP
1.883-018	FERRYBOAT OPERATOR, CABLE (water	444	17.0802	SHIP AND BOAT OPERATION AND MAINTENA
	trans.) I	444	17.0802	SHIP AND BOAT OPERATION AND MAINTENAN
1.883-026	MOTORBOAT OPERATOR (any ind.)	444	17.0802	SHIP AND BOAT OPERATION AND MAINTENAN
1.883-030	QUARTERMASTER (water trans.) WINCHMAN, CARGO (water trans.)	444	17.0899	COMMERCIAL FISHERY OCCUPATIONS, OTHE
1.883-034 1.884-010	ABLE SEAMAN (water trans.)	322	17.0801	SEAMANSHIP
1.884-022	FERRYBOAT-OPERATOR HELPER (water trans.)	322	17.0801	SEAMANSHIP
1.884-026	MARINE OILER (water trans.)	322	17.0801	SEAMANSHIP
1.884-030	SAILOR, PLEASURE CRAFT (water trans.)	322	17.0801	SEAMANSHIP
1.887-022	DECKHAND (water trans.)	360	17.0801	SEAMANSHIP
1.887-034	ORDINARY SEAMAN (water trans.)	360	17.0801	SEAMANSHIP
2.138-010	SUPERVISOR, TICKET SALES (air trans.)	243	04.19	TRANSPORTATION
2.168-014	SCHEDULE ANALYST (air trans.)	261	04.19	TRANSPORTATION
2.368-010	AIRPLANE-DIC ATCH CLERK (air trans.)	265	04.19	TRANSPORTATION
2.368-022	RESERVATIONS AGENT (air trans.)	265	04.19	TRANSPORTATION
2.368-026	TRANSPORTATION AGENT (air trans.)	265	04.19	TRANSPORTATION
2.384-010	AIRPORT SERVICEMAN (air trans.)	271	17.0403	GROUND OPERATIONS
2.388-010	TRIP FOLLOWER (air trans.)	276	17.0403	GROUND OPERATIONS
3.138-010	ROAD SUPERVISOR (motor trans.)	305	04.19	TRANSPORTATION
3.168-014	DISPATCHER, BUS AND TROLLEY (motor		-1	
	trans.)	261	04.19	TRANSPORTATION
3.463-010	BUS DRIVER (motor trans.)	519	04.19	TRANSPORTATION
3.463-018	TAXI DRIVER (motor trans.)	519	04.19	TRANSPORTATION
4.168-014	DISPATCHER, OIL (petrol. production;	261	04.16	PETROLEUM
4.382-010	petrol. refin.; pipe lines) CONSTRUCTION-AND-MAINTENANCE	201	04.10	TEIROLEON
4.302-010	INSPECTOR (petrol. refin.)	271	16.0116	PETROLEUM TECHNOLOGY
4.782-014	OIL PUMPER (petrol. production)	435	17.3202	PUMPING PLANTS
4.782-018	STATION ENGINEER, MAIN LINE (pipe	, , ,	_,	
	lines)	435	17.3202	PUMPING PLANTS
4.885-010	DREDGE OPERATOR, BRIDGE (mining &			
	quarrying)	447	17,3202	PUMPING PLANTS
4.885-014	GAS-TRANSFER MAN (comp. & liquified	1		
	gases)	447	17.3202	PUMPING PLANTS
